Summary

IT professional with over ten years of experience managing technical teams, support operations, and systems administration in Apple and corporate environments. I have led departments of more than twenty technicians, coordinating incidents, optimizing workflows, and ensuring service level compliance (SLA) across organizations from various sectors. Specialized in comprehensive systems administration, IT asset management, virtualization, and troubleshooting of complex issues in Windows, Linux, and macOS environments.

I am currently expanding my skill set towards cloud infrastructures, containerized services, and process automation.

Work Experience

IfixRapid, S.L / TeslaMobile Baleares, S.L

IT SERVICE MANAGER | TECHNICAL SUPPORT LEAD

Madrid, Spain

2017 - Present

- Management and coordination of a technical team of over 20 professionals.
- Resource planning, ticket management, and implementation of procedures under established SLAs.
- Administration of on-premise systems, including server management, networking, and data backups.
- IT asset management: hardware, licensing, repairs, inventory control, and operational cost optimization.
- Direct coordination with Apple for incident escalation and advanced issue resolution.
- Implementation of technical protocols and continuous training for staff.
- **Achievements:** reduced average resolution time by 30% and improved customer satisfaction rate to over 95%.

UniversoMac, S.L.

APPLE CERTIFIED SUPPORT TECHNICIAN

Madrid, Spain

2015 - 2017

- Diagnosis and repair of Apple hardware and software.
- Configuration of local networks, operating system installation, and backup management.

Resumen

Profesional IT con más de diez años de experiencia gestionando equipos técnicos, operaciones de soporte y administración de sistemas en entornos Apple y corporativos. He liderado departamentos de más de veinte técnicos, coordinando incidencias, optimizando flujos de trabajo y garantizando el cumplimiento de los niveles de servicio (SLA) en organizaciones de distintos sectores. Especializado en administración integral de sistemas, gestión de activos IT, virtualización y resolución de incidencias complejas en entornos Windows, Linux y macOS.

Actualmente continúo ampliando mis competencias hacia infraestructuras cloud, servicios dockerizados y automatización de procesos.

Experiencia
